

Proposed Signage and Illumination Statement for Light box Signage at Empower Centre 47 Botley Drive, Havant

PO9 4PU

Short Statement

Project Description:

Installation of a new internally backlit illuminated light box fascia sign to the front elevation of the property.

Illumination Details & Compliance:

- **Sign Type:** Internally illuminated static light box sign.
- **Maximum Luminance:** **426 candelas per square metre (cd/m²)**.
- **Beam Orientation:** 180 degrees from front face of signage.
- **Lighting Controls:** The proposed signage can be dimmed further than this if required by HBC. While the sign is capable of a peak output of **426 cd/m²** to maintain clarity and visibility the system can be scaled down further if required.
- **Night-time Operation:** The proposed signage will only be illuminated during the hours of Dusk till 22.30. This can be adjusted if required.
- **Public Safety and Amenity:** The illumination will be completely static with no flashing, moving, or intermittent light elements. The sign has been designed sympathetically without causing distraction to highway users or detriment to neighbouring properties.
