

Dear sir / madam,

Thank you for consulting HCC LLFA on the above planning application.

We assume details of the surface water drainage design for these phases of the project will be submitted at a later date to discharge the specific surface water drainage condition. Sufficient information has been presented at this stage to describe the surface water drainage strategy for these phases and to give confidence in the feasibility of a scheme.

The LLFA have no comments and no objection to the reserved matter application for phase 7 and phase 8.

Regards,

Scott Glover
Flood and Water Management Engineer
